Continental Refrigerator

Refrigerated Griddle Stands are available in seven sizes. All models are standard with stainless steel interiors and exteriors. Three different size drawers hold 6-inch deep pans side-by-side and offer a 250-lb. capacity. Heavy-duty drawer tracks have built-in drawer safety clips. All cabinets have the option of a left or right condensing unit.

Eagle Group

QuadPLUS shelving combines polymer mats atop a wire truss frame. The unit is interchangeable with the company's other shelving lines. Standard shelf collars or Quad-Adjust collars are available. Dishwasher-safe polymer mats include antimicrobial protection that retards bacteria growth, mold and mildew on shelf surfaces. www.eaglegrp.com

Hoshizaki America, Inc.

The KMS-822MLH Serenity Series Ice Machine utilizes a remote condenser and compressor which introduce less noise and minimal heat into the kitchen. The 22" x 24 5/8" x 24 5/8" unit has a space-saving design and CFC/HFC-free foam. www.hoshizaki.com

LoLo Commercial Foodservice Equipment

These 45-gal. floor kettles are designed for batch cooking. Gas and electric units are available as well as tilt and stationary models. The steam-jacketed design offers energy-efficient heat transfer through the bottom and sides of the kettle. www.getLoLo.com

Purple Saf-T-Grip Allergen Saf-T-Zone cutting boards alert staff that they need to follow special food allergy procedures to protect guests from allergen exposure. Icons embossed into the purple board call out the eight most common food allergens. Bilingual instructions on the cutting board direct staff to segregate and prep food, then wash, rinse and sanitize the board and tools after each use. The cutting board is made of co-polymer that is NSF listed. www.sjcr.com

The Fusion Food Warming Tray keeps prepared foods hot and ready to serve in a variety of applications, including buffet lines and concession stands. The line includes cool touch handles, adjustable temperature control, stainless steel construction and skid-resistant feet. www.tomlinsonind.com

Vulcan Equipment

Energy Star-qualified non-insulated holding cabinets are constructed of stainless steel. The VHFA 18 energy-saving unit provides fast heat transfer for quick preheating and recovery times. The top-mounted, recessed control panel includes adjustable dial thermostat, on/off switch for the fan, and on indicator lights for the power and heater. www.vulcanequipment.com
