

## LAUNDRY, UNIFORMS AND MORE

The new washer-dryer stack from **Miele Professional** promises high performance in the smallest of footprints. This stack requires only half a square meter of floor space and is able to process 35 lbs (16 kg) of laundry per cycle. A joint control panel is located between the two machines and incorporates two displays, one for each unit. The range of programs available comprises more than 50 washer and 40 dryer programs.

**Miele & Cie, Guetersloh, Germany.**

**Caddie** Lotus Valet housekeeping trolleys feature detachable satellites, fully independent trolley extensions allowing direct entry into the room without having to move the central unit and equipped with a laundry bag or standard cord bag. They can also be fitted with a plastic bag for collecting trash. Trolley handles are located at the average shoulder height of 25- to 45-year-old women. A new, fluid and round-edged design — inspired by the lotus flower featured on the trolley — can be customized with a color palette of finishes and bags to match the interior decor of any hotel. **Caddie, Schiltigheim Cedex, France.** [caddie.com](http://caddie.com), [caddie@caddie.com](mailto:caddie@caddie.com)

The TAL Collection for **Standard Textile** offers jacquard ensembles for the bed and bath. The line is the result of collaboration with Todd-Avery Lenahan. Lenahan's designs are expertly crafted and delicately colored specifically for luxury hotels, then manufactured with the durability of Standard Textile's Centium Core Technology engineering, ensuring their long life and reduction of total ownership costs. **Standard Textile, Cincinnati, Ohio.** [standardtextile.com](http://standardtextile.com)

The DHS-18 MAX from **Domus** is a high spin washer extractor with a fully programmable microprocessor with wet cleaning options. Domus is ISO 9001-approved and also ETL-, GOST- and WRAS-certified. DOMUS has a network of dealers in more than 150 countries. **Domus, St. Julia de Vilatorra, Spain.** [domus.es](http://domus.es), [e.colomer@domus.es](mailto:e.colomer@domus.es)

PowerFry VK Series Fryers from **Vulcan** use Vulcan's FivePass heat transfer technology, maximizing uniform heat transfer to the oil, resulting in faster recovery and cook times. The Energy Star-qualified PowerFry VK Fryers also feature a SoftStart ignition system that gently heats cold oil, prolonging oil life while saving energy through low idle rates. Plus, lower flue temperatures can reduce kitchen A/C costs. **Vulcan, Baltimore, Maryland.** [vulcanequipment.com](http://vulcanequipment.com)
